

My Project

The purpose of the description is to bring the user the option to be updated on new/old movies Search for customer favorite genres.

A Little about --- the site

By clicking on the logo
you can return to the
Home page

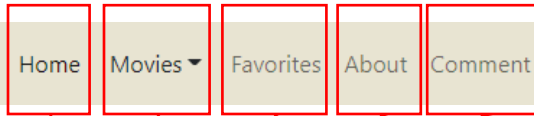

Clicking a button
you can darken the
site

Clicking a button
will light up the site

Currently this area is
not accessible, under
development (this is a
private area)

The home page
and a brief
about the site

Here you can
find movies by
category

Here you can
get all your
favorite movies

In this area I
detail my
experience

Area for
comments
about movies

HOME PAGE

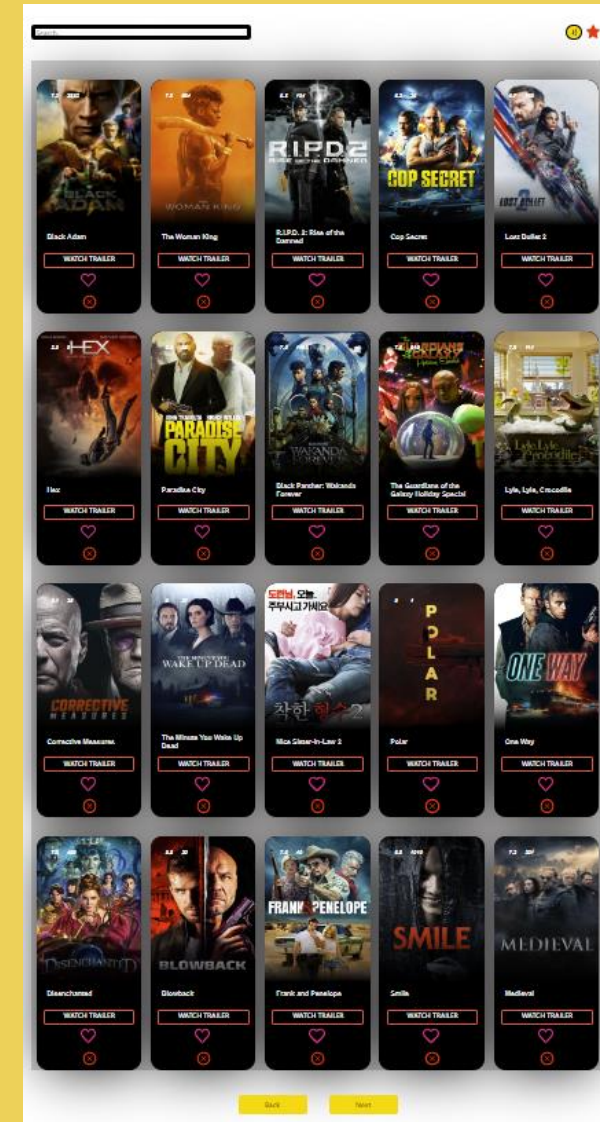

Brief about my website

On the home page I included the general explanation of the site and gave a background on which technology I used

MOVIE PAGE

At HOME you can get an overview of the entire site with points using REACT's sphere Of course, my experience in the world of programming and an explanation of each column are attached.

Action

Adventure

Animation

Comedy

Crime

Documentary

Family

Fantasy

By clicking on a movie button, genres from the movie world will develop

Clicking on one of the genres will bring you to a lot of movies from the genre

Search..

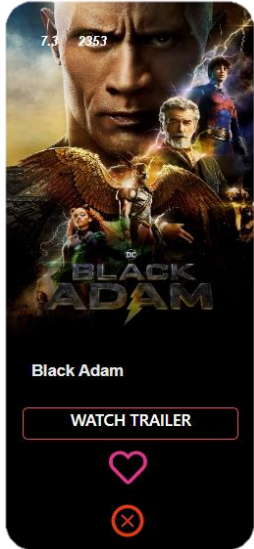

Search movies

The best movies

Arrangement according to ABC letters

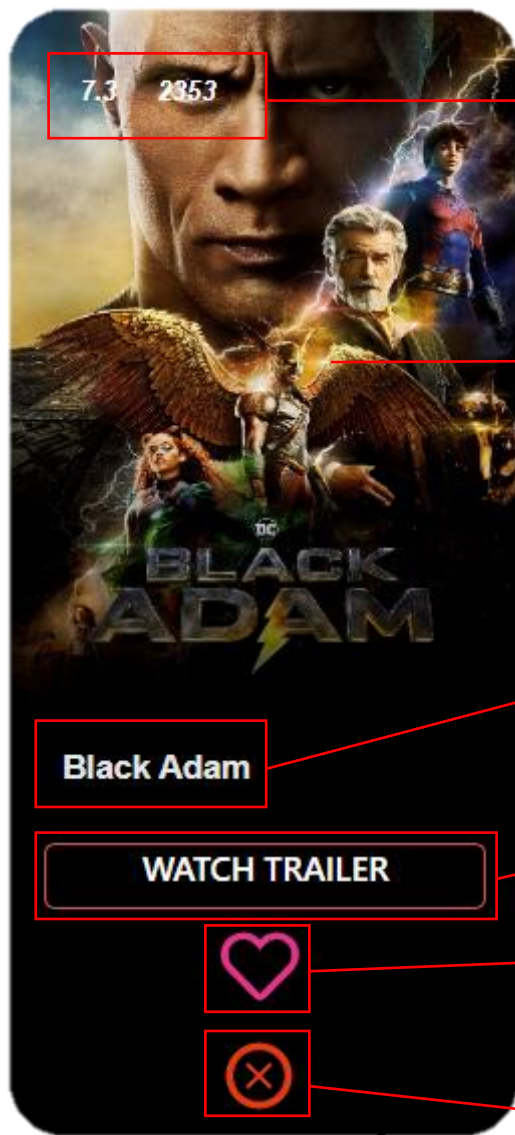

Arrangement according to ABC letters

Back

Next

You could go to the next pages and also return to the previous page

This area is divided into two parts:
1. The left side - rating of the film.
2. Right side - how many watched the movie

Clicking as a panel on the card we can dive into a piece of the film

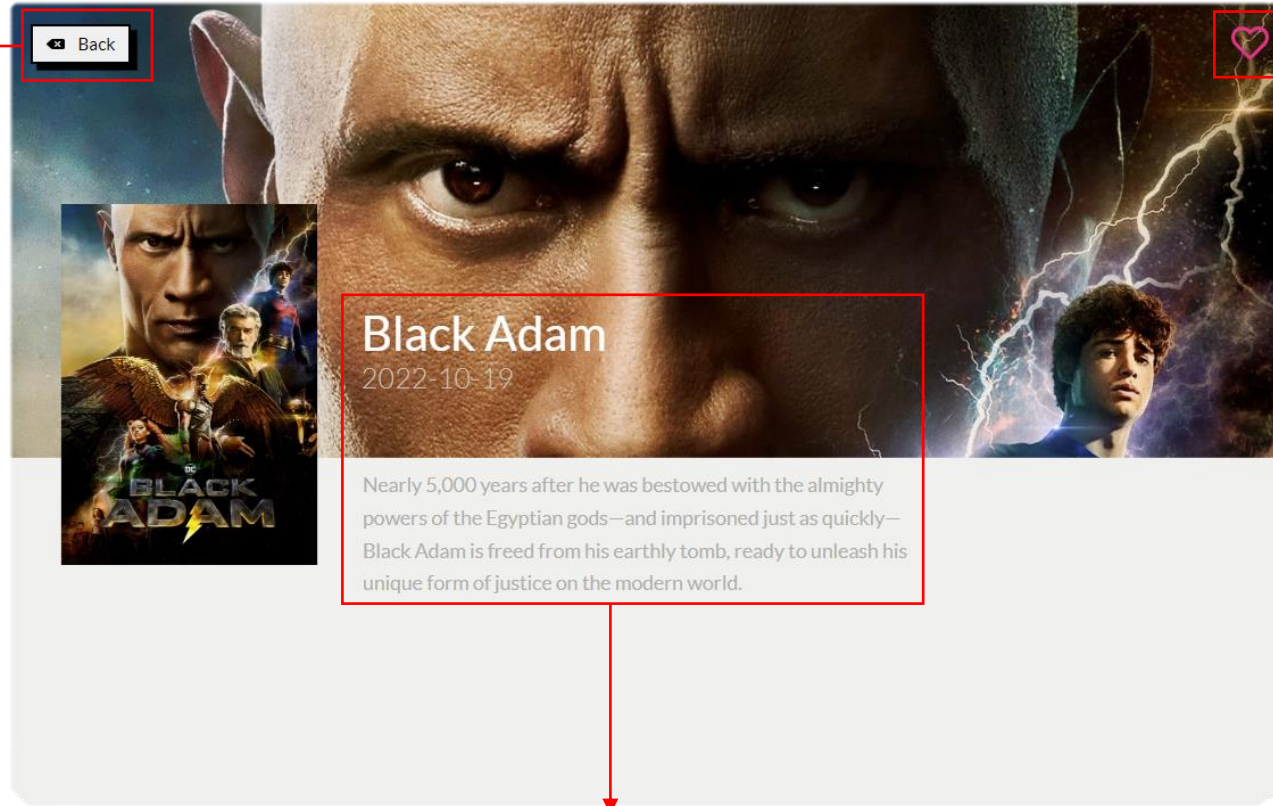

The name of the film

Ability to watch the trailer of the film (currently inactive)

You could save the movie by clicking the "Save" button, then it goes to the favorites column

Deletes a movie permanently

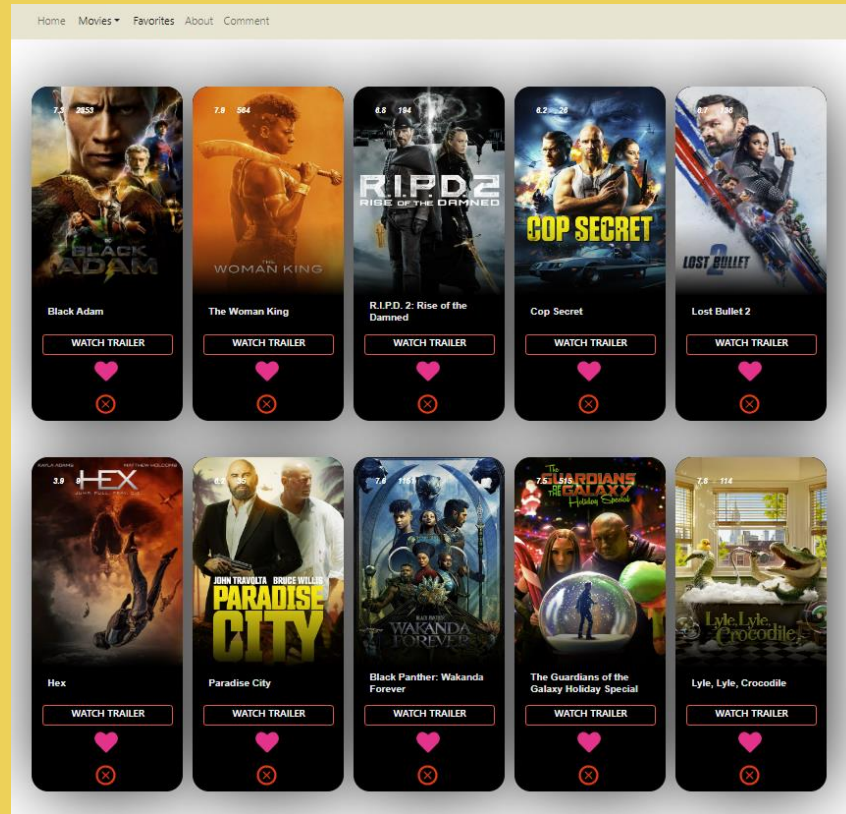

Back to the
previous page

Clicking on the
heart will save
the movie in the
favorite area

Deletes a movie
permanently

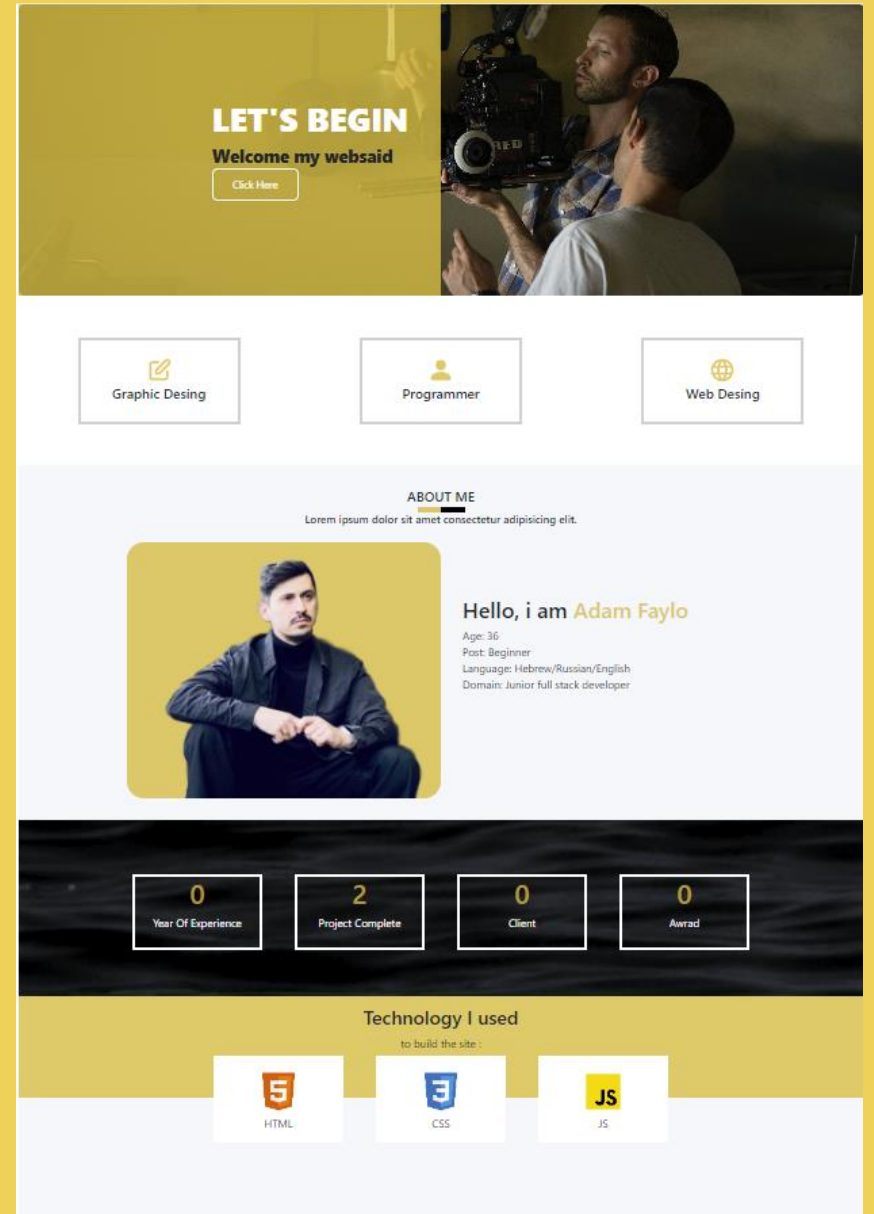

FAVORITES PAGE

Here you can get all your favorite movies

Here you can get about my experience in the programming world
